### REGISTER AND REFORMULATION

#### Exercise 3

Create a small explanation about death, then try to adapt it for the following audiences:

1. A group of primary school children.
2. A group of High School students.
3. A group of young adults who tend to speak colloquially amongst their friends.
4. A group of doctors attending a medical convention.

### Examples:

1. At one point during our lives God decides that he needs our help in heaven and he takes us to go live with him. Everyone is different so that's why everyone dies at different times and we're not sure when or how it will happen.
2. If there's one thing that we can be certain of, it's that we will eventually die. There is no way to tell when or how we are going to die. Death is a part of human nature and it will happen to everyone.
3. Everyone bites the dust. Ain't no one gonna know when their time's up and there ain't no one who's gonna live forever cuz everyone's gotta die. That's just the way the cookie crumbles man.
4. All known organisms inevitably experience death. The genetic make-up of all human beings is different hence the reason why all humans die at different intervals in their lives. It is impossible to pinpoint the exact moment when someone's life will come to an end. There are many different types of phenomena that may bring about death, including old age, malnutrition, disease, suicide, murder and accidents resulting in terminal injury.
